

PAPERPULP CABINETS BY DEBBIE WIJSKAMP

1984, the Netherlands
ArtEZ Art & Design Arnhem
Product Design
debbiewijskamp.com

To develop a new building material made from discarded items, Debbie Wijskamp began by researching ways in which to reuse old (news) paper. She combined pulp and a bonding agent to make sturdy building blocks, from which she constructed handsome cabinets. The new material can be used in various ways and is suitable for all sorts of products.
